Dear Sir/Madam,

Please accept my resume as application for employment in your organization where my experience as an accomplished Oracle Developer with expertise in the full systems development life cycle methodology can be fully utilized.

I am an accomplished Oracle Developer with expertise in the full systems development life cycle methodology. I have over 15 years of experience in Oracle Development working in healthcare, financial and military organizations.

Currently, a consultant working with Keane, Inc., I have been tasked as a subject matter expert with teams in Halifax, NS, Southfield, MI, and India to provide client-focused, high quality analysis and support of an ORACLE Data Warehouse which supports a variety of business requirements via numerous distributed database applications operating 24 hours a day. Support is provided using PL/SQL and a variety of applications in a Windows XP/Cisco VPN/HP UNIX/Oracle environment for an Application Maintenance Management Project between Keane, Inc. and a Global 2000 client.

Prior to my current employment, as a Senior Systems Analyst with Capital District Health Authority (CDHA), I led the ORACLE software development for the support of the Oncology Patient Information System (OPIS), which serves the Nova Scotia Cancer Centre, Cape Breton Cancer Centre, and all cancer clinics throughout the province.

I have experience in installing and using Oracle Database v6 - 10g and the Developer Suite 2000 / 10g, using a variety of software applications including Oracle Forms, UltraEdit-32, TOAD, PuTTY, WinSCP, CiscoVPN, various Instant Messaging applications, various Ticket Systems, SQL, PL/SQL, and SQL*Plus, researching, investigating, and leading feasibility studies regarding application conversions from Oracle Forms 3.0 to Oracle 4.5 and Oracle Forms 4.5 to Oracle 10g, training key users in the use and operation of developed database applications and other related duties.

As a project leader and as a member of Oracle project teams, I have acquired strong skills in the areas of database development and database administration. I have the ability to assess and meet customer needs while working in a fast-paced, time-critical environment. You will find me to be highly motivated and able to take initiative, thinking outside the box to find creative solutions to problems. Using excellent organizational skills, I have the ability to respond promptly and efficiently to ensure customer satisfaction.

I am confident I have the qualifications for the position of Oracle Developer and feel my experience and expertise would contribute to the business goals of any organization. I would appreciate an opportunity to meet with you to discuss my qualifications further.

Thank you for your time and consideration of this application for employment in your organization.

Yours truly,

Dean K. Anderson, B.Sc., B.Ed.
